

State/Territory: Mississippi

STANDARDS FOR THE COVERAGE OF ORGAN TRANSPLANT SERVICES

Experimental organ transplants are not covered. Transplants, which are covered, include, but are not limited to:

- kidney
- liver
- heart
- lung

For Medicaid recipients age 21 and older, medically necessary organ transplants are covered up to the regular fees and limits which apply to all services covered by the Medicaid Program.

\$591.15 - maximum surgery fee
30 days - maximum inpatient stay

For EPSDT recipients, medically necessary organ transplants are covered, if not considered experimental and reimbursement is based upon the usual and customary charge. Before the organ transplant is performed, a reimbursement fee is negotiated with the facility and agreed upon by all involved parties.
